

Loans for Fees and Subsistence

1. General information

Depending on its funds, CHaCHaCHi gives out loans to students for professional education. There is no guarantee for any loan. If a student has completed the application form and fulfills all the requirements, we will *try* to assist in the higher education.

University students have to apply for HELB as soon as they get the calling letter. They will get assistance from us only in few urgent situations, which are well explained to us.

CHaCHaCHi offers a loan for Technical Colleges between 150'000 to 200'000 KES for the entire duration of the education including the following attachment.

For students of a 2-years-course, this means 75'000 to 100'000 KES per year.

For students of a 4-years-course, this means maximum 50'000 KES per year.

The amount for the upkeep is generally limited to 4'000 KES a month (9 months) with a reserve for urgent requirements.

2. Students must fulfill the following rules (or assistance might be stopped!):

- We need a **short monthly report** in the last week of each month by mail. Please send it to info@chachachi.org and a copy to aditjackline@gmail.com. Without report, no money. If the report arrives late, the money will arrive late as well.

- You must send us copies of the **exam results, information of the school, fee structures, all receipts** and any other relevant papers. We also need to know how long the semesters / terms last.

- **You have to be totally transparent** and inform us completely and immediately about any assistance or support you get from elsewhere and about any changes: in your studies, familiar situation, economic situation (if you get for example a small job) etc.

- During the holidays we don't assist you. You need to find a job to help yourself and your family and to save some money for the next semester.

With the best wishes for successful studies
